

SUBHOJEETH MANDAL

React.js Developer · Frontend Developer · Java Application Developer

subhojeethmandal4432@gmail.com | +91 8328398495 | Hyderabad, India | [linkedin.com/in/subhojeeth-mandal](#) | [github.com/SubhojeethMandal](#)

PROFESSIONAL SUMMARY

Results-driven software developer combining expertise in Java application development with modern React.js frontend engineering. Experienced in building full-stack web applications using React, Spring Boot, and MySQL, as well as robust standalone Java systems with JDBC. Adept at REST API integration, responsive UI design, and clean component-based architecture. Committed to delivering well-structured, maintainable software that solves real-world problems effectively.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, React Hooks, React Router, Context API, useReducer, Component-Based Architecture, Responsive Web Design
Backend & APIs	Spring Boot REST API, RESTful API Integration, Axios, Fetch API, JSON Server, JDBC
Database	MySQL, Oracle, LocalStorage
Core Java	Core Java, OOP, Java 8 Features, Java Collections, Error Handling & Input Validation
Tools	Git & GitHub, Eclipse IDE, Visual Studio Code, NPM

PROJECT EXPERIENCE

Hospital Management System

React.js | Spring Boot | MySQL | REST API

A comprehensive full-stack hospital platform covering patient registration, appointment scheduling, and medical record management — React frontend backed by a Spring Boot REST API.

- Designed a responsive, component-based UI in React.js with intuitive navigation across patient, doctor, and admin modules.
- Integrated the React frontend with Spring Boot REST API for full CRUD on patients, appointments, and medical records.
- Leveraged React Hooks (useState, useEffect) for state management, lifecycle handling, and real-time API data fetching.
- Architected a normalised MySQL database schema to support scalable, relational data storage.
- Implemented React Router for seamless multi-page navigation and applied thorough validation on both frontend and backend.

E-Commerce Web Application

React.js | Context API | JSON Server | REST API

A feature-rich e-commerce app with product browsing, cart management, wishlist, and user authentication — built with React and persistent local data handling.

- Built a full user authentication system (login/register) using JSON Server as a lightweight backend for credential management.
- Implemented shopping cart and wishlist with LocalStorage for persistent cross-session data.
- Integrated an external product API for a live, searchable, and filterable product catalogue.
- Managed global cart and user state using Context API and useReducer; multi-page routing via React Router.
- Delivered a fully responsive, modern CSS interface ensuring a consistent experience across all device sizes.

Bank Management System

Java | MySQL | JDBC | Java Collections

A console-based banking application simulating real-world operations with multi-account support, transaction management, and secure user interaction.

- Designed multi-account support per user using Java Collections and MySQL for persistent data storage via JDBC.
- Implemented comprehensive error handling and input validation ensuring secure, reliable operation.

Movie Ticket Booking System

Java | JDBC | MySQL | Java Collections

A Java booking system with movie listings, seat selection, and booking confirmation backed by a MySQL database.

- Managed movie schedules, seat availability, and user bookings using Java Collections framework.
- Implemented JDBC connectivity for CRUD operations on movies, sessions, and booking records.

Shopping Products Standalone Application

Java | JDBC | MySQL

A standalone Java e-commerce app with separate Admin and Customer login flows for product lifecycle and order management.

- Admin module supports adding, editing, and removing product listings; customer module enables location-based browsing and purchasing.
- Implemented JDBC for reliable CRUD operations on product and order data stored in MySQL.

EDUCATION

Master of Computer Applications (MCA)

Sept 2024 | CGPA: 6.51

Manpower Development College, Hyderabad

Bachelor of Computer Applications (BCA)

July 2022 | CGPA: 7.80

Siddhartha Degree & PG College

Intermediate – MPC

March 2019 | Marks: 891

Sri Chaitanya Jr Kalasala

Secondary School Certificate (SSC)

March 2017 | CGPA: 8.80

North City High School
